

RRC MAP Home Page Navigation Instructions

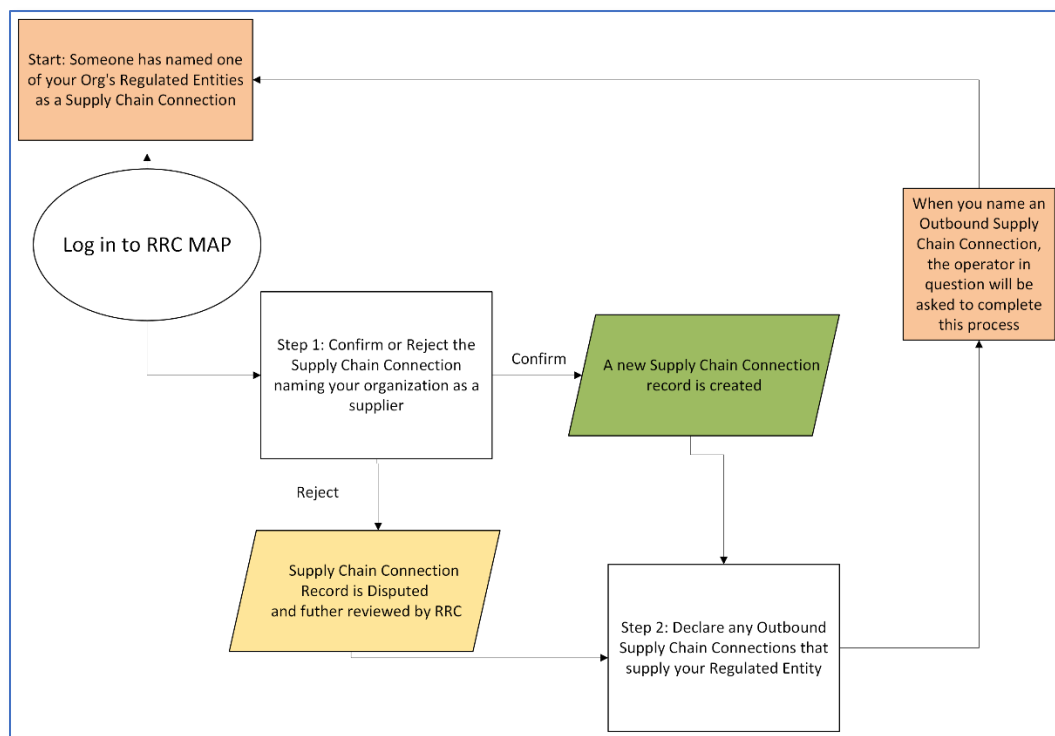

RRC MAP (Mapping Automation Portal) is a way for operators in the state of Texas to coordinate in the event of an emergency who supplies gas to whom.

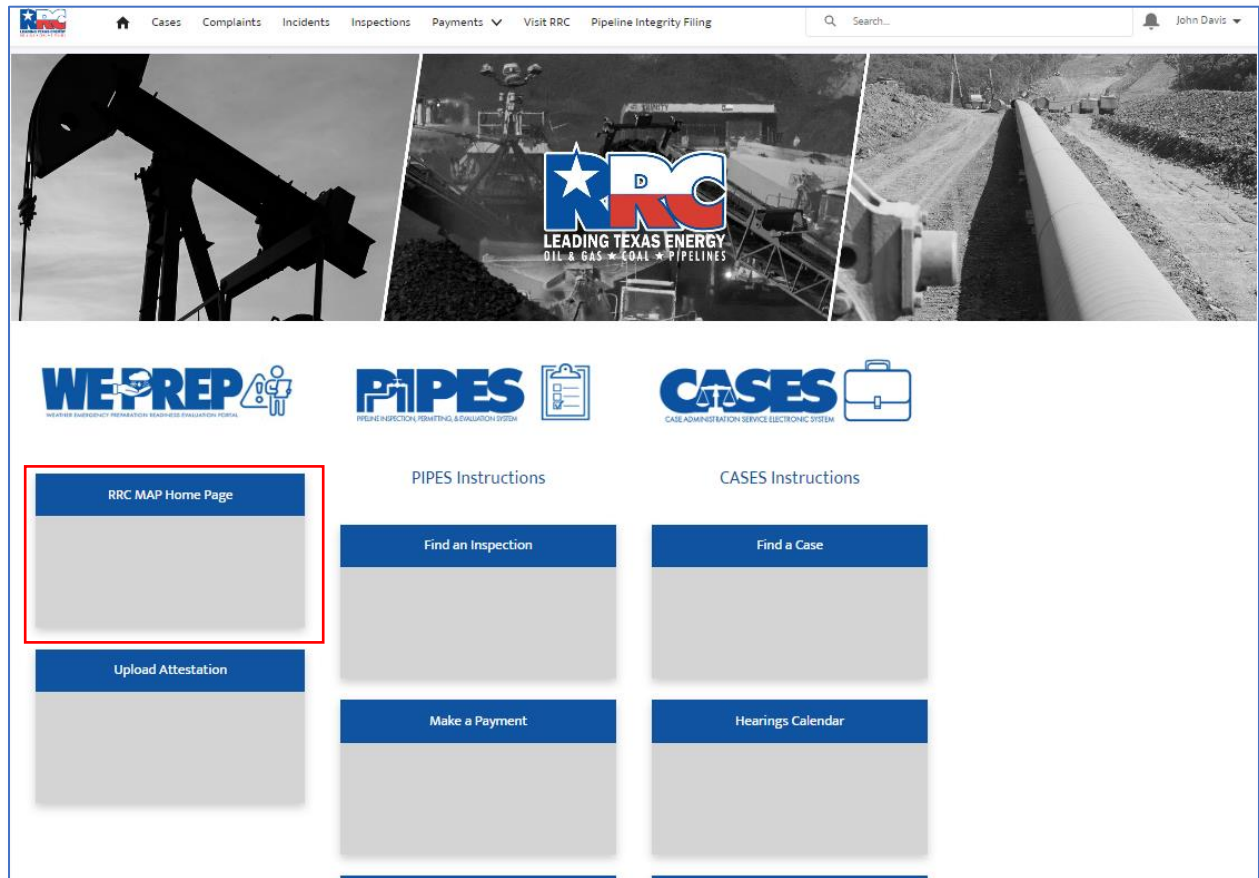

By operators identifying and tracing their pipelines, producers, and suppliers, that have been defined as “Critical Infrastructure”, RRC will be able to quickly identify issues that may impact supply chain connections between operators.

As an operator, you are responsible for:

- Verifying any Supply Chain Connections (SCCs)
 - When a Power Plant or other Operator names your Regulated Entity as a supplier, you will be asked to confirm the Supply Chain Connection
- Declaring any Outbound Supply Chain Connection (SCCs)
 - Once you verify your SCCs, you will then name one or more of your supplier’s Regulated Entities that supplies gas further up the stream to your Regulated Entity as an Outbound Supply Chain Connection

Additionally, RRC MAP allows operators to view and acknowledge correspondence from the RRC Critical Infrastructure Division related to your Supply Chain Connections, request review or an amendment for an existing Supply Chain Connection, and review the Regulated Entities belonging to your organization that have been named as Critical Infrastructure by RRC.

1. Find the RRC MAP Home Page button (outlined in red above) and click to open:

You are now in the RRC MAP Portal

Select an Operator

RRC MAP Home

[Click here to download instructions for how to complete this process](#)

Select Operator i

APACHE CO. ▼

- The 'Select Operator' drop-down (highlighted above in red)
- After selecting an operator, the following sections will populate data related to the record

RRC MAP Home Page Layout

1. Confirm Your Regulated Entity as a Supplier
2. Add Regulated Entity as Receiver
3. View Outbound SCC
4. Request SCC Changes
5. Disputed
6. Correspondence
7. On Map

This tab allows you to confirm or reject any Supply Chain Connections (SCC) where an Operator named you as a **supplier** of gas to their Regulated Entity. You can select which of your Regulated Entities is the gas supplier based on the Regulated Entity type listed by the Operator who named you as a gas supplier.

Supply Chain Connections (SCC)

➔ STEP ONE: Confirm your Regulated Entity as a Supplier (7)

CHS Facility Name	Operator	Identified Facility Type	Operator Supplier Type	Due Date	Status	User Responded
